

WINEGARD® Wingman® Antenna

For use with Sensor II or III Antenna Heads Manufactured after 1990

Enhances UHF Performance. No tools required for installation. No wires to connect.

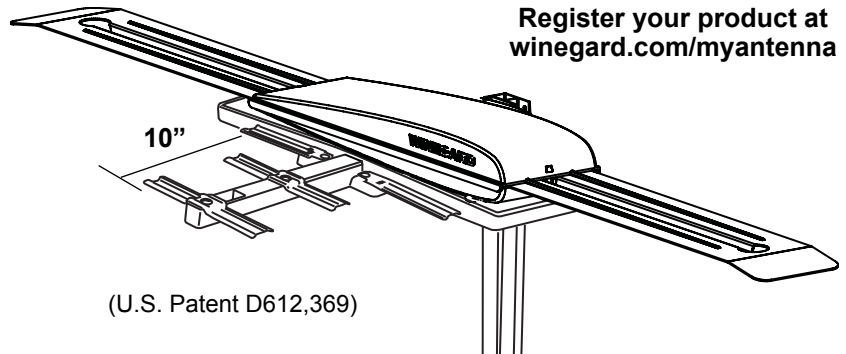

Parts Included:

(1) Wingman unit, (4) Push Rivet

**NOT ALL PUSH RIVETS WILL
BE USED WITH ALL MODELS.**

Installation:

**NOTE: Skip steps 1, 2 & 5 for antennas
mounted to a permanent structure.**

Register your product at
winegard.com/myantenna

1. Allow at least 10" of clearance between the Sensor® and the nearest obstruction or the edge of the roof.
2. Raise the Sensor® antenna.
3. Remove the rubber bumpers from the bottom of the Sensor. This can be done with your fingers or pliers.
4. Line the holes in the Wingman up with the holes from which you removed the rubber bumpers. Gray models will not have bumpers.
5. Insert the push rivets provided into these holes. Push the rivet tabs until they click and lock into place.
6. Lower Antenna.
